

Training Workshop

Saturday August 18, 2012

Glendale, AZ

You wouldn't let him play football without wearing a helmet.
Why would you let him return-to-play without using ImPACT?

This workshop will offer medical professionals a half day of academic training on Concussion 101, Return-to-Play Protocols, Interpreting the ImPACT Clinical Report, and Case Presentations. The workshop includes a 200 page workbook and a completion certificate. CEUs are available for athletic trainers.

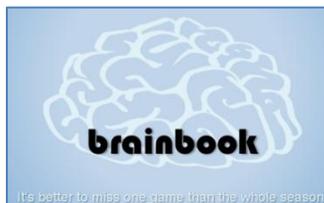

The workshop venue will be located at University of Phoenix Stadium; 1 Cardinals Dr.; Glendale, AZ 85305. Please park in the North Preferred lot and enter at Gate 2 ramp to the club level and take a left through the glass doors.

To register please visit our website at: <http://impacttest.com/training/workshops>

If you require a hotel, please click on the link below:

ImPACT's products provide information regarding potential cognitive decline and related symptoms that may be experienced after head trauma. ImPACT's products are not diagnostic, do not determine whether an individual has a particular head or brain injury and should not be used to make a return to play decision without an examination by a qualified and licensed health care professional. Many jurisdictions have rules and regulations governing the process and procedures under which an individual may be returned to play. Please check the rules and regulations in your state, county, organization and/or school district for legal requirements and further guidance.
